### **DETAILED ACTION**

Claims 12, 4-12 and 14-23 are pending.

#### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The issue that remain are as follows.

#### ***Terminal Disclaimer***

2. The terminal disclaimers filed on 27 June 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent 6,585,820, patents issuing from Application numbers 10/525,912, 10/528,471 and 10/541,804 have been reviewed and are accepted. The terminal disclaimers have been recorded.

#### ***Claim Objections***

3. Claims 1-2, 4-12 and 14-23 are objected to because of the following informalities: applicants should employ the language "C24-C34 polymerized methylene-coupled alkyl phenol" to be consistent with the disclosure. See original specification at paragraph bridging pages 8 and 9. Appropriate correction is required.

#### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 1796

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-2, 4-12 and 14-23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 7,294,189, in view of Luongo. US 6.251.979. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the patented claimed invention.

To the extent the copending claims lack a disclosure of complexed starch, Luongo (column 11, lines 39-48) discloses perlite containing water-repellent compositions as wax emulsions to impart water-repellency to the gypsum product. Luongo (column 12, lines 31 et seq) discloses employing starch and borate to impart adhesive and bonding properties to the perlite additives.

The instant claims otherwise encompass the '189 claims containing a preservative since the instant claims employ open transitional language.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-2, 4-12, and 14-23 have been considered but are moot in view of the new ground(s) of rejection.
